Office Action Summary

Application/Control Number: 09/429,283

Art Unit 2823

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The amendment filed 11/20/2000 is objected to under 35 U.S.C. 132 because it introduces new matter into the disclosure. 35 U.S.C. 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the amendment to line 3 on page 93. There is not seen support for 30 KeV but only for 50 KeV in the pointed to Table.

Applicant is required to cancel the new matter in the reply to this Office action.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 14-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kadosh et al '739 in view of Wolf, Vol.2.

The rejection is maintained as stated to be applied to claims10,14 and 15 in the paper mailed 6/20/00.

Applicant argues that there is no suggestion to dope a single gate layer to have different N concentrations in Kadosh et al '739. However, Kadosh clearly suggests formation of transistors with

Application/Control Number: 09/429,283

Art Unit 2823

appropriately controlled boron doping to eliminate the need for the barrier implant thus suggesting formation of both kinds of transistors on the same substrate as useful to produce working devices. Note the disclosure at column 1, lines 1-25, that different kinds of transistors are commonly formed on a single wafer.

Claims 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 19-27 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action.

Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Application/Control Number: 09/429,283

Art Unit 2823

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group Receptionist whose telephone number is (703) 308-0956. **See MPEP 203.08**.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner George Fourson whose telephone number is (703) 308-2544. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (703) 308-4918. The fax number for this group is (703)308-7722(and 7724 and 7382). MPEP 502.01 contains instructions regarding procedures used in submitting responses by facsimile transmission.
